

HARIS JAMSURI

Nilai, Negeri Sembilan, Malaysia | harisjamsuri.github.io | Open to Hybrid / Remote · KL · Cyberjaya · Selangor

PROFESSIONAL SUMMARY

Technical-commercial operator with 10+ years of experience across IT support, SaaS product development, and telecom business expansion. Built and deployed two production systems (analytics SaaS and AI-enabled LMS) independently under constrained environments, demonstrating full-stack execution and product ownership. Experienced in translating technical systems into business outcomes, including enterprise partnerships, retail expansion (200+ locations), and stakeholder advisory with telco executives. Positioned for client-facing roles where technical depth directly drives revenue, retention, and account growth.

CORE COMPETENCIES

Technical & Development

- PHP (Vanilla) · HTML · CSS · JavaScript
- SaaS Architecture & Full-Stack Development
- Server Administration & Optimisation
- Database Performance Tuning
- AI Integration (Chatbots, TTS, Prompt Tools)
- Website Migration & CMS Configuration
- Network Troubleshooting & IT Support

Tools & Platforms

- Elementor · Autocount · Google Analytics
- Integromat / Make
- Codex (AI-assisted dev) · GitHub
- Shared Hosting Environments

Business Development & Sales

- B2B & Enterprise Account Management
- Commercial Tender Negotiation
- Telco Product Strategy (Prepaid / Postpaid)
- Retail Network Expansion (200+ locations)
- Executive & C-suite Stakeholder Management
- Airport & Highway Concession Management

Operations & Service Management

- IT Service Management
- Incident Management & Escalation Handling
- Global Service Desk Operations
- Cross-functional Project Coordination
- SLA Adherence & KPI Reporting

PORTFOLIO PROJECT

Annur Urut | On-Demand Massage Service Platform (In Development)

- **Architecting and developing a Progressive Web App (PWA)** for a commission-based on-demand massage service, acting as the sole full-stack developer managing backend logic and frontend execution using Vanilla PHP.
- **Designing distinct, fully mobile-optimized interfaces** for both clients and therapists, implementing core PWA features to deliver a native app-like experience directly through mobile browsers.
- **Engineering critical safety and operational functionalities**, including a real-time SOS/emergency location-sharing tool for therapists and a comprehensive, desktop-based Master Admin dashboard.
- **Operating under shared hosting constraints**, optimizing performance and system reliability while driving the entire product lifecycle from initial business logic to iterative build phases.

ClickSight.online | Web Behaviour Analytics SaaS

- **Built and deployed a SaaS analytics platform** (session recording + heatmaps) from scratch, covering system architecture, backend logic, and frontend delivery, acting as the sole architect and full-stack developer for the entire product lifecycle.

- **Designed tracking infrastructure** including visitor identification, session replay, and event capture – simulating capabilities of tools like Smartlook.
- **Operated under shared hosting constraints**, optimizing performance and system reliability without cloud infrastructure.
- **Demonstrated full ownership** across product lifecycle: concept → build → deployment → iteration

BelajarBina.online | AI-Integrated Learning Management System (LMS)

- **Shipped a fully custom LMS serving 58+ registered users**, evolving the product from a Google Drive-based content hub to a hardcoded HTML/CSS/JS frontend and then a complete Vanilla PHP backend integration on shared hosting.
- **Engineered and embedded AI features directly into the LMS platform**, including a custom chatbot, prompt generators, and a text-to-speech module — gaining applied experience in AI product integration ahead of market adoption.
- Used AI-assisted development (OpenAI Codex) to accelerate backend delivery, demonstrating comfort with modern AI-augmented engineering workflows.
- Operated as sole developer, product manager, and growth lead, demonstrating the cross-functional leadership and end-to-end project ownership required for Technical Account Manager (TAM) and IT Project Management roles.

P R O F E S S I O N A L E X P E R I E N C E

Technical Operations Specialist · Suamisihat (M) Sdn Bhd

Apr 2022 – Oct 2022

- Engineered complex business workflow automations using Integromat (Make), seamlessly linking e-commerce checkout triggers to EasyParcel fulfillment, automated email sequences, Telegram community routing, and custom WhatsApp chatbot auto-replies.
- Architected a centralized inventory routing system that automatically synchronized order data from multiple independent e-commerce storefronts into a single master database, ensuring real-time stock tracking and operational visibility.
- Diagnosed and resolved production-critical server issues: rented server chokeholds, site timeouts, database query bottlenecks, and complex WordPress plugin conflicts — restoring uptime and performance under pressure.
- Executed end-to-end website migrations and software integrations (including Autocount), and built client-facing websites from outsourced UI/UX designs, frequently acting as the technical liaison with external SaaS vendors.

Customer Support Advisor — Kaspersky Global Project · SCGS (Malaysia) Sdn Bhd

Aug 2020 – Jan 2021

- Delivered Tier-1 technical resolution for global Kaspersky end-users, covering system vulnerability remediation, software conflict resolution, and security incident triage.
- Managed multilingual, multi-timezone support cases with a focus on accurate first-contact resolution and high customer satisfaction.

Business Development Manager / Acting General Manager · QS Empire Sdn Bhd (Telco) *Jan 2018 – Jan 2019*

- Represented the company as Acting General Manager in C-suite and executive meetings for a telco operator with active partnerships across Digi, Maxis, and XOx.
- **Revived a dormant PLUS Highway concession account**, negotiating reinstatement and expanding retail coverage to R&R Seremban, R&R Dengkil, and R&R Tapah — turning a zero-revenue relationship into an active multi-site footprint.
- **Secured commercial tenders with Malaysia Airport Niaga**, establishing and maintaining operational retail and promotional outlets across KLIA1, KLIA2, Penang International, and Langkawi International Airport.
- **Drove nationwide expansion of PERNAMA partnership from near-zero to 200+ active retail locations, significantly increasing market footprint and revenue channels** — one of the largest footprint expansions in the company's history — through aggressive territory planning and distributor management.
- Advised senior telco executives on consumer market intelligence, directly influencing the strategic structure and positioning of local prepaid and postpaid product tiers.

Technical Analyst / Service Desk — Syngenta Global Project · DXC Technologies

Feb 2017 – Jan 2018

- Provided first-line technical and network support across global enterprise platforms for a multinational agrochemical client.
- Managed incident queues, priority triage, and escalation routing within an ITIL-aligned global service desk framework.

Customer Support Representative · Fujixerox Asia Pacific Pte Ltd

Mar 2014 – Aug 2016

- Remotely diagnosed and resolved complex printer, network, and driver issues for corporate clients across Singapore and the ANZ region.
- **Consistently recognised as a Top Resolver** in the Singapore division for efficient XDA service debugging — a metric tied directly to resolution speed and first-contact accuracy.
